Update 17  
27 days ago

Thank you! An anonymous offline donation made it possible to complete this project! And here's an update from Ecuador ...  
... What a project to have completed! Every single one of you can be proud of these two houses that were built in Mompiche after April's devastating earthquake. They're small houses, built from wood and bamboo, but are quite solid and very comfortable for both families who have now moved in. The kids are over the moon to be out of their tents and into their beds. The parents are pleased and grateful in equal measure. Each family has made (or is making) minor modifications to the original design, using recycled materials from houses that were destroyed. We are extremely grateful to all of you for your generous donations. We can assure you that every cent went towards building these two houses, and the owners cannot express their gratitude enough. From Mompiche with love, thank you.

I am so proud to be a part of these two families finding a new home. As someone who lives in an earthquake-prone place I know and have felt the power of the earth as it moves. We have to move with it to help our neighbors wherever they may be. XXoo
